

NEURO-engineering Summer Research Program

NSF Research Experience for Undergraduates (REU)

Biomedical Engineering

New Jersey Institute of Technology

Spend your summer performing cutting-edge research in neuroengineering at a multidisciplinary environment that integrates engineering and medicine.

Research Projects include:

- *Materials for Neural Tissue Engineering*
- *Neurofunctional and Neurobehavior Analysis*
- *Multicellular Neural Tissue Engineering*
- *Neuromuscular Control*

- **Program Dates:** May 27 – Aug. 2, 2013
- **Stipend** of \$4,500 per student
- **Travel stipend** of up to \$350.
- **Free-of-charge on-campus housing.**
- NJIT Campus is 30min from NYC.
